The USC Village Construction Jobs Collaborative is a
program operated for Hathaway Dinwiddie and USC by
PVJOBS, a non-profit workforce development organization
providing job placement opportunities.
The USC Village is the flagship residential community for USC undergraduates, combining academic, student housing, recreational, and retail space to create a fully integrated living and learning community. USC has committed to goals in the building of the project that include 30% local worker participation, 10% local disadvantaged worker participation, and 20% apprentice utilization. The USC Village Construction Jobs Collaborative is committed to providing career-oriented employment opportunities to local residents to help USC make these goals.
